Due to the variety of possible further processing, installation and operating conditions, experience shows that it is not possible to draw any binding conclusions about the behavior of our products in a system. Therefore, it is especially the responsibility of the operator, to check the suitability of the chosen product for the relevant application. Further information about approvals can be found on our website www.frenzelit.com or are available upon request.

The installation of our products and materials must be executed by professionals under consideration of the applicable guidelines. Installation guidelines as well as further useful information can be obtained on our website (www.frenzelit.com/techinfos). Our application engineers are pleased to assist you for any non-binding consultation.
